The National Emergency Management Organisation (NEMO) of Saint Vincent and the Grenadines has indicated the following list of supplies which are needed in the health sector to aid in the management of the disaster caused by the ongoing volcanic eruptions in the country.

The country is managing the disruptions caused by the volcanic activity while controlling the heightened risks associated with the COVID-19.

The economic fall-out in the agricultural sector is significant.

The list below indicates the current needs aimed at preserving the livestock whose sources of food have been severely affected by the ashfall.

SECTOR: AGRICULTURE

FEED NEEDS FOR LIVESTOCK: ONE (1) WEEK			
Item #	Item Name	Description	Qty
1	Layers		50,000
